125mm Angle Grinder

DWE4257−QS

The electronic variable speed control offers added tool control and enables the tool to be used at optimum conditions to suit the accessory and material

Electro−mechanical clutch reduces the "kickback" transmitted to the operator if the cutting disc jams

No volt release switch will prevent the unit starting when plugged in, even if the switch is in the on position. Switch must be consciously reset before power is delivered

Overload protection will prevent the unit over heating by shutting the unit off until the unit has cooled down

Dust ejection system removes majority of debris from the air which passes over the motor, preventing abrasion and tracking

Uncertainty K 1 (Vibration)	**1.5 m/s²**
Perform and Protect	**YES**
Clutch	**YES**
Power Input	**1500W**
Power Source	**Corded**
No Load Speed	**2800−10000 Rpm**
